Mr. William E. Muno, Chief
Environmental Protection Agency
Region V
Hazardous Waste Enforcement Branch,
5HE-12
230 South Dearborn Street
Chicago, Illinois 60604

Dear Mr. Muno:

**RI/FS WORK PLAN REVISION 3 - FEED MATERIALS PRODUCTION CENTER
(FMPC)**

This letter transmits two (2) copies of Revision 3 to the RI/FS Work Plan and supporting documentation which incorporates all comments provided by Ohio EPA and your office on June 24, 1987 and December 21, 1987.

This final version of the RI/FS Work Plan and supporting documentation represents an unannotated version of the Work Plan Revision 2 transmitted with my February 11, 1988 letter to your office and is provided as discussed and agreed to in a meeting held between Department of Energy (DOE) and your agency representatives on February 4, 1988. Your expeditious approval of the RI/FS Work Plan is necessary in order to assure that DOE can meet the schedules outlined in the Work Plan.

We propose handling future changes to the sampling plan or other aspects of the RI/FS Work Plan, as requested by DOE or USEPA, as addenda to the RI/FS Work Plan. These addenda would be acknowledged and approved by your office. This approach will retain the integrity of the Work Plan and provide documentation on all requested and approved changes to the Work Plan. The recent change to the Work Plan requested in your letter to me subject, "Re: D and D Facility", received on March 22, 1988, will be handled in this manner.

We look forward to your timely approval of the RI/FS Work Plan. Please contact me at FTS 774-6319 or Margaret Wilson of our Environmental Protection Division at FTS 626-8528, if you have any questions on this subject.

Sincerely,

James A. Reafsnyder
Site Manager
